# DHE Computer Systems
Education Solutions Brochure

About Us

DHE is a nationally accredited Technical Sales and Services company. Our offices are centrally located in Centennial, CO and Tempe, AZ. We are a Certified Woman Owned Small Business Enterprise. The industries we specialize in include: Education (K12 & Higher Ed), Small and Medium sized Businesses, Government (Federal, State & Local), Healthcare, as well as End Users.

Our Services

Enrollment & Deployment

Our certified experts work tirelessly to deploy and manage your networks, virtual environments, servers, and computers so you don't have to! We also provide premier white glove optimization of Chromebooks for education deployments.
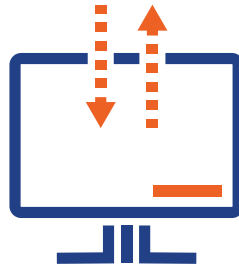

End-User Services

Working with individuals on their personal computer is just as important to us as working with businesses. Whether it's hardware, software or virus related. Our team of trained and certified technicians are here to help solve your problems and get you and your computer back on track.

On-Site Services

DHE has local and knowledgable on-site service technicians ready to configure, deploy, and trouble-shoot network security, wireless access points, servers, storage resources, and much more!

Remote Services

Our experienced technical team uses industry standard remote applications to connect to your computer and identify problems with your PC, tablet or network device.

Software Integration

Our experts at DHE work with your budget, current software integration, and mainte nance needs to make sure you get the software requirements you want. Stay organized and maximize effectiveness of your network and patient care with secure and optimized software applications.

Systems & Equipment

One of the key benefits of choosing DHE as your technology provider is our complete understanding of solution design, configuration and the implementation processes. We provide highly customizable options tailored to your needs versus what generally comes fresh out of the box.

Sourcing & Procurement

We work directly with solution providers and manufactures to deliver the best pricing for just about every type of requirement. Our account representatives assist with special pricing, technical resources, services and overall product configuration assistance.

Device as a Service (DaaS)

DHE's next generation subscription bundle can effectively boost employee productivity and IT scalability in one cost effective solution. Simplify management and procurement of a vast array of desktops, workstations, and mobile devices by having a robust computing solution tailored to the needs of your evolving workplace.

Flexible Deployment Solutions

DHE's White Glove Enrollment Service allows you to effectively and efficiently deploy devices without hassle. We professionally customize, configure, and stage your devices to your business requirements so all you have to do is pick up your device, log in, and begin work right away with all optimization and configuration already done.

Schedule
Contact DHE to coordinate a pre-deployment plan with a dedicated representative to improve efficiency on tasks such as equipment delivery and staging, user training, and other deployment tasks to ensure implementations remain on track and within budget.

Procure
Your assigned dedicated representative works with you to ensure we get you the right technology and hardware to meet your business or institutions requirements.

Stage
Once your hardware is securely received at our facility, your devices are professionally configured and optimized to your unique specifications.
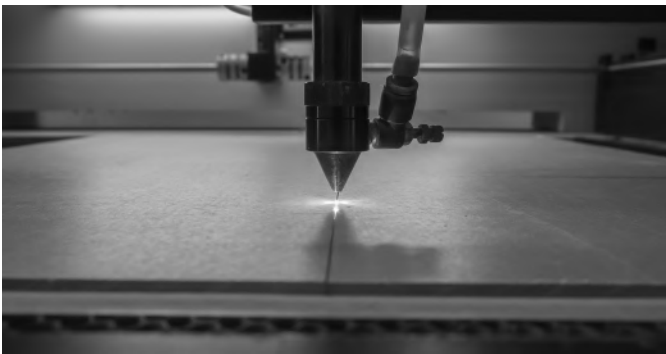

Deploy
After initial optimization and configuration, we ensure you have a smooth installation which includes a detailed strategy and execution plan by our highly-qualified staff for your device integration and rollout.

Manage
Have piece of mind knowing we routinely manage, review, update, and test your product investment after deployment.

DHE's Custom Laser Engraving

DHE's custom laser engraving service allows you to permanently brand each Chromebook with your personalized logo. DHE performs laser engraving in-house to ensure top-notch quality.

DHE's Asset Tagging

With DHE's physical asset tagging and management service you effectively gain better control over your assets and reduce risk of loss or theft. Our asset service is designed to be integrated quickly and painlessly so you can instantly have visibility and accurate records of your recently acquired IT assets as soon as they arrive at your facility.

Chromebooks

The Cutting Edge Affordable Way To Learn

Chromebooks are rapidly becoming ubiquitous in academic environments. Designed to be superior in speed and navigation, Chromebooks utilize browser and network based storage without the need for hefty hard drives. This facilitates faster boot times and response times, longer battery life, and rapid web browsing so you won't lose any work to laggy devices. Plus, built in anti-virus software protects all of your most important documents and files with multi-layered encryption security to keep out un welcome malware and viruses.

Chromebook White Glove

DHE's White Glove Service will configure and stage your Chromebooks professionally and customize for your schools Google Apps domain. We ensure your Chromebooks are installed and optimized for peak performance as soon as they come out of the box.
